Friday and Saturday, June 11-12

Jack Dempsey and Estelle Taylor

-IN-

"Manhattan Madness"

ALSO A GOOD TWO REEL COMEDY

Special attraction on Wed. June 16

CLARESHOLM LOCAL NEWS

Remember, Wednesday, June 16, is the big sports day at Clareholm.

Miss M. Griffin of Macleod spent the week-end with the Misses Boniface.

Carl J. Braren is attending the annual meeting of Alberta Masonic Grand Lodge, at Banff this week.

Fred Fairbairn left on Monday for the States where he will travel in the interests of a large furniture company.

There will be a special attraction at the Rex theater on Wednesday night, the night of sports day, at regular prices.

Mr. Bond, piano tuner for W. G. Moffatt, will be in Clareholm next week. Any wanting piano tuned, please leave word with Mr. Moffatt.

A pickup sale will be held on Saturday, June 26 at the Vanhous Brewery barn. List anything you have for sale with the auctioneer, A. E. Runions.

J. F. Reynolds left last Friday night for Eugene, Oregon, where he has gone into business. Mrs. Reynolds and the family will follow when school closes here.

The score in the baseball game played here on the 6th, between Clareholm and Coalhurst was 26-7 in Clareholm's favor. The score tells the story of the game.

Jack Dempsey and Estelle Taylor (Mr. and Mrs. Jack Dempsey) at the Rex theater on Friday and Saturday nights this week, in "Manhattan Madness."

A splendid program has been arranged for Clareholm sports day, June 16. There will be a baseball game, football game, horse races and other sports. There will also be a big dance at night.

A telegram was received on Thursday announcing the death of Mrs. T. D. Lewis at Santa Pasadena, California. She had suffered a paralytic stroke about a week ago but was apparently recovering from it when she had a relapse and passed away, on the 10th. The funeral will take place at Calgary.

Mrs. Bergetta Winden, mother of Ole Winden, living 11 miles southeast of town, died last Saturday, aged 62 years. The funeral took place on Monday, interment being in Five Mile cemetery. The deceased had been a patient in the local hospital the past month, suffering from paralysis.

Wednesday's telegraphic dispatches brought the news that Mrs. W. E. Sibley, wife of a Canadian missionary in China, had been murdered on Monday in the streets of Chengtu. Mrs. Sibley was well known in Clareholm. She was the daughter of Rev. J. M. Harrison who was pastor of the Methodist church here for three years, from 1911 to 1913.

After many weeks of dry weather, high winds, hot winds, and dust storms, a glorious downpour of moisture set in on Thursday night—one of the real old time June rain and snow storms. It is all of a million dollar downpour for this section of Alberta. Just how much damage has been done by the drought and winds it is too soon to make a fair estimate, as fields that had appeared to be ruined will pick up wonderfully with plenty of moisture.

PUBLIC NOTICE

Re Visitors to Grounds and Gardens of School of Agriculture

The public is welcome at all times to visit the grounds, gardens, experimental plots, farm and buildings at the School of Agriculture, Clareholm.

Frequently flowers have been picked from the gardens and shrubbery, especially by children. The school authorities therefore find it necessary to exclude children of school age from the grounds unless accompanied by parents or other responsible persons.

The public is hereby notified that picking flowers on the school grounds is absolutely prohibited. S. H. Gaudier, Principal.

MARRIAGES

Hess—Hansen

At the United Church parsonage on the afternoon of Monday June 7, the Rev. Geo. G. Webber united in matrimony Evelyn Margaret Hansen, daughter of Hans H. Hansen of Parkland, and Cecil George Hess, son of George A. Hess of Nanton. After a short trip to Spokane and other western points, the happy couple will take up their residence on the groom's farm near Nanton.

Nowlin—Ellison

At the United Church parsonage, on the afternoon of Tuesday June 8, the Rev. Geo. G. Webber united in matrimony Muriel Margaret Ellison, daughter of Thos. Ellison of the Clareholm district, and Thomas Roy Nowlin, son of Thos. W. Nowlin of Sundial. Mr. and Mrs. Nowlin will make their home at Turin, Alberta, on the groom's farm.

28th INTERNATIONAL EUCHARISTIC CONGRESS

Canadian Pacific to Operate Special Trains

The 28th International Eucharistic Congress, to be held in Chicago, June 20 to 24, 1926, will be one of the greatest religious demonstrations that the world has ever seen.

With the sanction of the Ecclesiastical Authorities and, for the convenience of people of western Canada, who will attend the Congress, the Canadian Pacific will operate special "Congress Trains," starting from Moose Jaw and Winnipeg. The Moose Jaw special will leave 5:30 p.m., June 18; the Winnipeg special 8:15 a.m., June 19. These specials will carry equipment of the latest type, and provide a fine, fast through service to Chicago.

Special sleeping cars will start from various points in the west and attached to the "Congress Specials" at Moose Jaw and Winnipeg.

Reduced Railway Fares

Reduced railway fare tickets from stations in western Canada will be placed on sale June 16th to 22nd, bearing a final return limit to July 2nd, 1926. These tickets will be honored on regular or special trains.

The Canadian Pacific are in a position to make hotel reservations in Chicago, whereby passengers may complete every detail of their arrangements prior to departure. As thousands will attend this event, those who intend making the trip should communicate as early as possible with the Ticket Agent in order that desired accommodation may be secured.

PROVINCE OF ALBERTA DEPARTMENT OF MUNICIPAL AFFAIRS

Notice is hereby given that unless all arrears of taxes imposed in respect of any parcel of land situated in Improvement Districts No. 100, 101, 130, 131, in the Province of Alberta, are paid on or before the First day of July next, such land will be dealt with under the provisions of the Tax Recovery Act, being Chapter 122, Revised Statutes of Alberta, 1922, with a view to obtaining Certificate of Title in the name of the Crown in the right of the Province of Alberta in respect of such parcel.

W. D. Spence,
Deputy Minister of Municipal Affairs,
Edmonton, June 4th, 1926.

NOTICE

Notice is given that if pasture on fair grounds is rented to Thomas Gray for 1926, those using the grounds must see that entrance gate is kept shut, otherwise a lock will have to be placed on it.

J. B. Watt,
Secy. Clareholm Park Association.

Says Nothing To Impede Navigation Through Hudson Straits Even In Winter Time

Are ice conditions in Hudson's Strait such as to impede navigation in the summer and fall?

"No," is the unqualified assertion of H. B. Rev. A. D. Dewdney, Chief of the Hudson's Bay Company, of Keweenaw, whose diocesan duties have taken him to the strait as recently as last summer. Bishop Dewdney goes further than this. He says ice will not impede navigation in the winter.

Opponents of the Hudson's Bay route for decades have argued that even if it were admitted that Hudson's Bay might be navigated for a reasonable period of the year, Hudson's Strait was an unknown quantity and would almost certainly be very dangerous to navigation at practically all times of the year.

There are no ice conditions in Hudson's Strait after the middle of July to impede navigation, he declared in an interview. In the case of supervising the work in his diocese, which extends almost to the North Pole, Dr. Dewdney has to travel the land skirting Hudson's Bay.

On his trip to the northern part of his diocese last year, he went through the Strait, and was told that ice conditions in Cuvana Bay to the south of the strait and along the Labrador coast were the worst he had seen, but there was no ice in the strait to affect navigation in the least, he said.

Dr. Dewdney asserted that Hudson's Strait is never frozen, even in winter, nor is there any that ice in fall and winter, as the ice away in the northern reaches of Fox Basin, thickening up at that time.

There might be discomfort from sailing in the northern waters of Hudson's Bay and Strait during the winter months, but as far as ice in the strait was concerned, or in the open waters of the bay, there was nothing to fear, he emphasized.

Dr. Dewdney tells of great changes in the great northern of Canada. Within the past year or two, the Hudson's Bay Company and Revillon Freres have opened for trading posts to the north. Within the next ten years he predicts that the rest of the country will be dotted with these posts, connected with the outside world by water transport. By that time the Eskimo will have largely disappeared his whaling and fishing and will have become like the Indian of the north, a trapper.

Western Fisheries

Prairie Provinces Secure Large Revenue From Commercial Fishing

Inland fisheries in the Canadian west (the three prairie provinces and the Yukon) had a commercial value of \$2,530,526 last year, according to the returns to the bureau of statistics and represent an increase of \$307,591 over the previous year. Of this, the bulk of the marketed catch was whitefish. Manitoba alone had \$1,427,071; Saskatchewan marketed \$439,645 of the harvest of her lakes; and the Yukon had \$145,594; and the Yukon \$15,270.

Satisfied Settlers

British Settlers in Alberta Are Very Pleased With Conditions

James Tynan, commissioner of the Allied Newspapers, Limited, comprising fifteen publications in the Old Country is making an investigation into conditions among the new settlers in Alberta. He reports that more than ninety per cent of the settlers with whom he has come in contact in Canada cheerfully declare that they have had a square deal and are satisfied with their possessions on rail franchises.

No Hates To Her

A pretty girl, residing once as a housewife at a charity bazaar, was approached by a wealthy man that had the reputation of being miserly. "How much for those chandeliers?" he asked, picking up a box of the chandeliers. "Five dollars," he was told. "No," he exclaimed, looking first at the chandeliers and then at the girl, "aren't you a little dear?" "No," he said, "I was the demure reply."

Boys Alberta, Prom

One of the first of the British youth under the Headley scheme to buy a farm in Alberta is A. W. Waddell, of Ontario. During the summer of 1924, when he studied at the Vergilion school under the Headley scheme last year, he bought a farm in the Leduc district.

Eucalyptus trees are being used up to the extent of the "under" of Palestine, as they thrive in swamps.

4,000,000 Pounds Of Honey

Manitoba Offers Exceptional Advantage To The Beekeeper

Beekeeping in Manitoba grows remarkably in the past few years. In 1925 there were 2,600 registered beekeepers in the province owning a total of 27,370 hives of bees, the production from which was over 4,000,000 pounds of honey worth \$15,048, according to a recent official report.

Manitoba has many more advantages as a honey-producing province than beekeepers from supposedly more favored lands have supposed. The hours of summer sunshine are long, especially in the high-producing season, thus enabling the bees to work overtime. There are some 230 wild hives in Manitoba which produce a honey of varying quality from early May to September. The principal flow is in July and August.

T. P. Floyd, provincial apiculturist, says that beekeeping in Manitoba is very popular with the ladies, and proves its popularity by reporting that in every line of the beekeeping, a woman of the province is a woman. He observes that mother and the girls on Manitoba farms and who in the past have been the mainstay of the measure responsible for the betterment of the situation, the main reason for the improved market was the generally higher standard of quality in the select and thick smooth sections, due to grading, coming from the beekeepers, and a reputation for the producing and manufacturing of high quality bees.

Canadian Butter Awards

Premier Awards Go To Canada At Dairy Show Held In London

At the dairy show recently held in London, England, Canada carried off the premier awards for butter. In the salted class Burns & Co., of Edmonton, Alberta, won the first prize with a score of 91 points, while Inland Creamery and Woodland Dairy, both of Alberta, were highly commended, both having scored 90 points.

The winner of the second prize for butter, scoring 85 points, was the Canadian Dairy Co., of Regina, Saskatchewan. The third prize was won by the Shool Lake, Manitoba, and O'Leary Dairy and Cold Storage Company, Prince Edward Island were commended, both having scored 82 points. The fourth prize was awarded the third prize with a score of 81 points, in the unsalted class Canada again carried off the first award, the successful competitors being the Saskatchewan Co-operative Creameries, Ltd., of Regina, with a score of 91½ points. Canada is exporting a very high class of butter and the results of this competition undoubtedly increase this export trade.

For Saskatchewan University

Two Manitoba Professors Will Take Up Work In Neighboring Province

Saskatchewan University is taking two of the Manitoba University professors away. Prof. J. S. de Lury, who has been associated with Prof. R. C. Wallace in the geological department of the University of Manitoba for a number of years and took charge of it when Prof. Wallace was commissioner of Northern Manitoba, will leave in 1927 to establish and organize a similar department in the Saskatchewan University. Prof. de Lury is a native of England and has been doing some geological survey work for the Saskatchewan Government.

Prof. R. L. McMillan has been appointed a chair of statistics in the University of Saskatchewan. The chair is being established to round out the three-year pre-medical course offered. Prof. McMillan has been at the Manitoba University since 1921. He will go to the sister university at the end of the academic year—1926.

Area Of Farm Land

Millions of Acres of Land Suitable For Agriculture in Canada

In the most recent compilation made by the Canadian Government bureau of statistics, the total land area of Canada is placed at 3,682,626,808 acres, of which 258,162,190 acres are possible farm lands and 140,587,900 acres are actually under cultivation.

In Eastern Canada 50,665,406 acres are occupied and 20,165,791 are still available for settlement. In the four provinces of Western Canada 90,795,297 acres are under occupation and 14,670,602 acres, suitable for agriculture, are available for settlement.

The average value of the occupied farm lands in Canada, both improved and unimproved land, including farm houses and buildings, is given at \$28 per acre.

The same authoritative compilation places an estimated value of the unoccupied land in Canada at \$704,287,000 compared with \$641,144,000 in 1924.

Canada's Sunniest Place

Qu'Appelle, Saskatchewan, Holds the Highest Thirty-Year Average

According to the records of the official weather man, Kamloops, British Columbia, enjoyed more sunshine last year than any other place in Canada. That city had a total for the year of 2,413 hours.

Qu'Appelle, Saskatchewan, was close second on the list in 1925 with 2,392 hours, but on the average for 30 years Qu'Appelle had 2,374 hours of sunshine, the highest average annual total in the Dominion. Winnipeg is given second place in the 30-year average with 2,154 hours, and Edmonton, third with 2,081 hours.

Last year Victoria, British Columbia, held third place with 2,267 hours, Calgary, Edmonton, Toronto and Ottawa each enjoyed over 2,000 hours.

Needed Protection

Florian—Chief, ah needs protection. Ah does not get a washcloth, but this mornin' when she says: "Nigger, let mah chicken alone."

Last year Victoria, British Columbia, held third place with 2,267 hours, Calgary, Edmonton, Toronto and Ottawa each enjoyed over 2,000 hours.

Eighty per cent of the population of India get their living out of the soil.

Livestock Prospects Encouraging

Cycle of Prosperity For Industry Now Entered Upon

There is much that is encouraging in the sixth annual Livestock Market and Meat Trade Review for 1925, just issued by the livestock branch of the department of agriculture at Ottawa. It was the best year for the feeder stock livestock in this country. It would appear, says the Review, that after a long period of depression in the industry that a cycle of prosperity has been entered upon and that, given normal pasture and feed conditions during the next few years, cattle, sheep and swine production should move from compensation for the troubles of the past. Prospects, it is definitely said, are encouraging.

The hog situation in Canada in 1925 was remarkable for strong and steady prices on a pretty good run and there was a very noticeable improvement in the general quality of the offerings. Hogs of good bacon weights and quality were \$7 per head higher than in 1924. While short supplies from Denmark and the United States and the shipment of 86,000 head from Canada to the Pacific coast, were a little measure responsible for the betterment of the situation, the main reason for the improved market was the generally higher standard of quality in the select and thick smooth sections, due to grading, coming from the beekeepers, and a reputation for the producing and manufacturing of high quality bees.

No. 1 Hard in Canada

Canadian Hard Wheat To Be Produced That Country

That Canadian number one hard wheat is being propagated in Australia is the Pacific coast, where a letter received a few days ago by the department of colonization, agriculture and natural resources, Canadian National Railway, Winnipeg. The communication is from Dr. Hamek, prime minister of Austria, acknowledging receipt of a letter from the Canadian government, which was sent to him in January last by the department. Dr. Hamek writes in part as follows:

"This product, which represents a highly qualified and well known all over the world standard seed, is very closely to the requirements of the Austrian Federal Institute in Vienna for analysis with a view to further utilization. The federal department of agriculture will provide for propagation of this sort of grain in order to advance Austrian agriculture."

Will Follow Canada's Lead

British Ministry of Agriculture Keeping Official Policy Records

Acting on recommendations made by the British Ministry of Agriculture, the British ministry of agriculture has drafted a policy for the official certification of poultry records and the recording of performance for poultry which has been in operation in Canada since 1919. The system, which is to be known as the English and Welsh Stock Poultry Laying Records, was decided upon after careful consideration and the action of the British ministry testifies to the high regard in which the Canadian policy is held in other countries. The three-year pre-medical course offered by the Dominion department of agriculture, recently improved Mr. Percy Francis, British poultry commissioner, during a visit to Canada in 1925.

Interesting To Speculate On The Future Development Of Agriculture In Western Canada

A new homestead area in Western Canada is inevitable. In authoritative opinion, it is a result of the discovery of the earlier maturing wheat which has pushed back the northern limit of agriculture, or from the production of seventy-five miles and added millions of acres to the productive area of Western Canada. The chairman of the board of railway commissioners has given it as his opinion that it will be necessary to push railway lines north to enter this vast new empire which Canada has so sensationally added to her economic possessions. It suddenly becomes a new factor in future Canadian land settlement, and adds substantially to Canadian farming opportunity as it will exist for land in the future. The long-term Canada has just completed a most remarkable quarter century of agricultural development, and it is the long-term development on what the quarter century is just starting upon may bring to her in this regard.

Small Fruits In Peace River Country

Strawberries, Raspberries, and Currants Grown At Beaverlodge, Alberta, Experimental Station

Small fruits do well in the Upper Peace River country. The superintendent, Mr. W. D. Albright, at Beaverlodge, Alberta, experimental station, reports that 1924 was a banner year for red and white currants, particularly for the former, that raspberries were abundant, and that strawberries should hold a substantial place in any farm garden.

The new Dutch, Victoria Red and Cumberland Red varieties of red currants were particularly successful last year, six bushes yielding respectively 92.5 lbs., 95.6 lbs. and 74.7 lbs. The large white Ottawa 550 and White Cherry Ottawa 550 varieties of white currants yielded 66.2 lbs. and 71.2 lbs. The black currants have not done well last two years. It is thought they have been pruned too liberally to obtain cuttings for distribution.

The herbaceous variety of raspberry to the best yield. In 1924 from a row of over eighteen rods long 148 quarts were gathered. Mr. Albright points out that assuming this variety drew a third of half a rod the yield would figure out 2,631 quarts estimated at 2,946 pounds per acre.

The first ripe strawberry was picked on June 26, on July 11 there was good picking, followed by continued picking up to August 10. From three to four feet long and spaced four feet, planted in 1922, 157 quarts were gathered, being at the rate of 1,779 quarts per acre, and five rows planted in 1923 yielded 41 quarts or 108 quarts per acre. Early Dakota is the variety cultivated. The 1923 planting, which was made last year, had few strong early-struck plants.

Export Cattle For Russia

Pure-bred Cattle and Sheep May Be Shipped From Vancouver Island

Vancouver Island pure-bred cattle and sheep may be shipped to Soviet Russia in considerable numbers to replace herds there slaughtered during the Russian revolution and the subsequent years of chaos. This was indicated in the sale of sheep from the farm of G. H. Hawden, near Duncan, to a cattle breeder from Moscow, recently. In a letter to the department of agriculture, Victoria, Mr. Forster says this Russian breeder plans to come back to this province again in the fall to purchase more stock.

Market For Canadian Wheat

A greater market for Canadian wheat is likely to be opened soon by the new grain export company.

In the opinion of John Bonar, new consul-general in Canada for the year 1926, prior to the war the wheat trade practically all of her grain imports from Russia, but this year the new consul-general believed Canada might be chosen by the Government as a field for grain purchases.

"Since the first London Paris aeroplane began flying in August, 1919, British civil machines have carried more than 60,000 passengers between London and the continent.

Market For Canadian Wheat

A greater market for Canadian wheat is likely to be opened soon by the new grain export company.

Sugar Beet Seed

Six Carloads Arrive At Raymond For Planting

Six carloads of best sugar seed for the sugar beet fields of Southern Alberta have arrived at Raymond and will be distributed to the beet growers at once in preparation for the coming season. Germination tests of this seed, made by the federal department of agriculture, shows an unusually high quality, and the returns for this year are expected to be quite good.

Always In Attendance

From an essay on the pleasures and sorrows of walking: "I have one discovery, no left leg and my right," declares G. M. Tynan. "When mud and body are out of your head, then you are in it. It is a state of mind, not a state of body, that one always catches mechanically from the other. I know that I shall be well again."

Would Admit Only Healthy

Railways have to guard the entrance of mentally diseased immigrants into the country, the establishment of psychopathic hospitals in Columbia, and regulations requiring the securing of clean bills of health before marriage, were urged before the mental hygiene commission in its sitting at Victoria.

B.C. Tin Mine

Tin is being produced commercially by the Consolidated Mining and Smelting Company at Trail, B.C. The tin is produced from the ore on one ton per day in the form of coniferite, is recovered as a table by-product from the Sullivan mine. A number of the tin lodes were first made in the company's laboratory.

Warm Welcome Given Famous Stanley Cup

On behalf of the Dominion Express Company which has carried the trophy across Canada, the Stanley Cup, time-worn emblem of the world's hockey championship, was handed by Angus Hays, deputy agent of the company, to T. Arnold, Vice-President of the Montreal Canadiens, recently. Mr. Arnold, acknowledging its receipt, Mr. Arnold expressed the gratification of his club at the service which had been rendered by the Canadian Pacific Railway in the frequent trips made by the club to the company's lines to meet their engagements.

"The comfort and even luxury of the club's travelling arrangements," Mr. Arnold declared, "went a long way towards keeping the players in good condition for their games."

In the past year the Stanley Cup has been the centre of the excitement of the past few years. There is hardly a square inch of its surface, interior or exterior, or of its pedestal, that is not marked by the name of some club, player or official, who at one time or another had it in their possession. To the club which has won the Stanley Cup of the cup after an absence of three years. It was filled with champagne and the players and everyone present drank the health of the trophy or the club.

"The comfort and even luxury of the club's travelling arrangements," Mr. Arnold declared, "went a long way towards keeping the players in good condition for their games."

French River Fishermen's Paradise

Upper—Pine Rapids, Camp at French River. Lower left—The result of one hour's fishing at French River. Lower right—New for breakfast.

By Ozark Ripley

There is a fascination to fishing new waters hardly equaled by the number of fish which are taken. Because every stream and lake has its peculiarities, a certain amount of study of local conditions is necessary. Successful fly and bait casting is study, especially when applied to bass and trout fishing. The man who devotes most time to studying a new lake or stream comes back home not only with fish but a perpetual mental picture of the resort he visited in the summer.

If every lake the bait or fly caster went he took fish just as he pleased then the real spice of the visit to the waters would be lost. Nobody appreciates anything in this world which is easily obtained. The real sport of angling is in seeking new waters, new waters and deriving most pleasure from the unexpected. Streams and lakes are living things and expect themselves accordingly. They may be full of all kinds of game fish and yet yield us nothing until we bow to local conditions and agree that they need venal study.

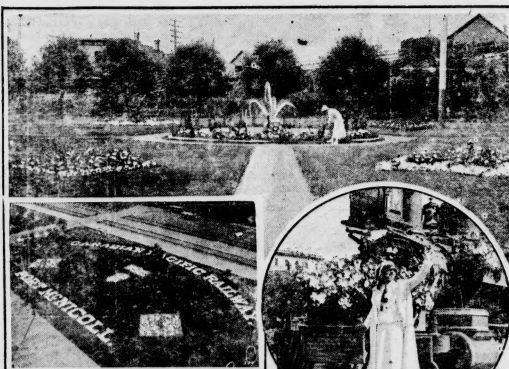

The first musky I ever took on a fly rod was near Pine Camp rapids on French River in Ontario. This time I could not be done. There were long trails before I succeeded and yet a little study brought me facts to my knowledge. Late in the evening I found that some of these big boys had a penchant for dropping over the little swift fall and preying on the walleyed pike which were so abundant below. The very first white feather-minnow I cast after he came possessed of this hunch connected me with a wace one that gave me a merry half hour following

up and down the rapid before victory came to my credit.

In the lower Niagara last summer where the river ends its course in Niagara Bay I was singularly fascinated by the clear, swift water and the poor results I had with ordinary trout and salmon flies, then every once in a while I could see one of the immense red-spotted fish rise along the east bluffs below the Canadian Pacific bridge. I knew for quite a while that these big trout were by nature minnow feeders, their special favorite was the little local chap harboring among the rocks, the ciscohead. But what pleasure would there be in taking one of these kindly brook trout with bait? Study of the river gave me an idea. Then for a lure I attached a quarter ounce snap swivel sinker to a feather-minnow made of Plymouth Rock river huckles. That is how I took my first five and one-half pound brook trout last summer in the Niagara.

There are bass lakes and bass lakes, bass streams and bass streams. This applies to the far South as well as the far North. Studying them carefully is what pays. I had to observe and study, and right off my solution came to me that the bait or fly fisherman wants to fish in the very places to which the worm fisherman never ventures, and wait until he sees bass feeding in these parts before he presents his artificial offering. As far south as Manawak in Quebec to the big mouth waters in Louisiana the same thing prevails. Right away is elucidated the necessity for studying waters, the habits of the denizens and everything thereabouts which will make or mar the sport.

Beautifying the "Garden Railway"

Upper—Kensington Station Garden. Lower left—Looking down on artistic Port McNicoll Station Garden. Lower right—"Countess of Dufferin" first C.P.R. engine to enter Winnipeg in her summer glory.

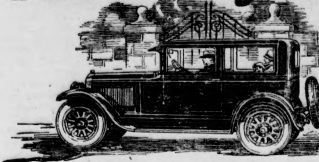

Living up to its title as the "Garden Railway", thousands of trees, shrubs and perennials were shipped out over the whole Canadian Pacific Railway system early in May this year. These included willows, poplars, lilacs, spiraea, honeysuckle, syringa, weigela, caragana, hydrangea, and many others. The perennials include roses of the climber and rambling variety and of all shades of color, tiger lilies, foxgloves, poppies, aquilegia, dianthus, sweet William, pyrethrum, delphinium.

Every year the floral committee of the C.P.R. has the stupendous task of supplying the seeds, trees, shrubs and plants to thousands of stations from Saint John to Victoria. Bulbs are supplied and planted in the fall, rearing their jaunty heads with the melting of the snows in the spring. The seeds are propagated under glass by experienced gardeners with a view to being transplanted when raised. In addition the committee sends out many thousands of seed packets to station agents and also for use in section foremen's gardens, bank houses and around shops. Enormous quantities of which are also provided and among these are geraniums, carnations, pansies, salvia, petunias, marigolds, atrichium, phlox, knoxian, sinclair, verbenas and alyssum.

During the Great War about 2,000 gardens were converted into vegetable-raising grounds and produced large quantities of food supplies for the provinces.

marigolds, atrichium, phlox, knoxian, sinclair, verbenas and alyssum. Railway gardening was introduced in Canada by the Canadian Pacific Railway about thirty-five years ago. The majority of the gardens are laid out and looked after by employees of the system. Locomotive firemen, signal towermen, watchmen, baggage attendants and others take a great interest in the making of the railway stations beautiful. Every employee is alive to the importance and the pleasure of making the railway stations beautiful. Each one of them is a gardener. The hobby of the denizens and everything thereabouts which will make or mar the sport.

Always

Better

REGARDLESS of the model or the price, McLaughlin-Buick has always been a good car and an outstanding value.

The underlying principles which make McLaughlin-Buick in every way BETTER are the result of years of experience and research developed by the vast Research Departments of General Motors—proved by the most exhaustive tests at the General Motors Proving Grounds—and finally incorporated as standard features essential to McLaughlin-Buick performance.

Today—as in the past and as we confidently believe, in the future—McLaughlin-Buick is the basis of all automobile values—the standard, for the entire continent, to which motor cars of every make seek to measure up. There is a McLaughlin-Buick model to meet your needs and at a price to suit your purse.

The new low GMAC financing rates are available to purchasers of McLaughlin-Buick on time.

Stomach So Bad Can't

Even Eat Fruit

"For years was badly constipated and troubled with gas after eating. Could not eat fruit and many other things. Adierka has done me good—can now eat anything." (signed) W. H. Fletcher. Adierka removes GAS and often brings astonishing relief to the stomach. Brings out a surprising amount of old waste matter you never thought was in the system. Stops that full bloated feeling and makes you enjoy eating. Excellent for chronic constipation—Clareholm Pharmacy.

WORLD HAPPENINGS
BRIEFLY TOLD

Two army aviators escaped injury by jumping with parachutes when their planes collided 2,000 feet above Lancaster Field, Virginia. The planes were completely demolished.

Doctors Baron Kline and Haglund of Sweden, who have been conducting experiments for several years, claim that they have discovered a cure for sleeping sickness.

For the first time in the history of the historic river Thames, an international boat race will take place June 26 this year, for the Duke of York's international gold trophy.

The Federal Government does not intend to establish an Indian hospital in Central Saskatchewan, it was stated in the House of Commons in answer to a question.

There are only 117 unemployed persons in Paris, whereas London, before the strike there, had 500,000 and Berlin 450,000. Minister of Labor Baraton said at a banquet inaugurating the Tours exposition week.

A dispatch from Chicago says out of his own pocket State's Attorney Robt. Crowe has offered \$5,000 reward for information leading to the arrest and conviction of the machine gun slayers of his assistant, William H. McSwiggall, and two beer runners.

A column of French troops tramped over the route to Souda and buried the remains of 2,000 of their comrades who were massacred by Druze tribesmen nine months ago while attempting to relieve the Souda garrison, which was besieged by the tribesmen.

A new cabinet has been announced in Poland, with Premier Witos at its head. The new ministry represents both the centre and the right wing parties. Foreign Minister Morawski of the previous cabinet retained his portfolio.

For the Little Fellow

The small boy will revel in this attractive version of the Oliver Twist suit. We call it the "little brother suit" because boys and girls of a similar size are sometimes dressed alike, and it makes a delightful companion to our "little sister dress" No. 1284. The blouse fastens with three scalloped edges on collar and cuffs. The sleeves are tailored for a shorter length, and the lower edge of the blouse is gathered to a wide band. The straight trousers open on the side and button onto the blouse. No. 1288 is in sizes 2, 4 and 6 years. Size 4 years requires 1 1/2 yards 36-inch material for the suit. Price 29 cents. Our new Fashion Book contains many styles showing how to dress boys and girls. Simplicity is the rule for well-dressed children. Clothes of character and individuality for the Junior folks are hard to buy, but easy to make with our patterns. A small amount of money spent on good materials, cut on simple lines, will give children the privilege of wearing attractive clothing. Price of the book 10 cents the copy.

The Resources
of an Empire!For Present and Future Development
in the Province of Alberta

DAMNATURE has been kind to the Province of Alberta. No Province of Canada occupies so strong a fundamental position as Alberta, with its great wealth of agricultural and other resources, the development of which has only just begun. Surely then, with so sure a basis for faith and confidence in the future, the people of Alberta need not hesitate to face the problems that arise, nor to join in the shoulder-to-shoulder movement for the intelligent promotion of the development of these great resources. Knowledge of these resources is all that is necessary to create confidence. It is for this reason that this newspaper presents below a brief review of Alberta's wealth and possibilities.

20 Years of Progress in Alberta

	1900	1920
TOTAL VALUE AGRICULTURAL PRODUCTS	\$20,000,000	\$256,000,000
WHEAT PRODUCTION	3,000,000 Bus.	103,000,000 Bus.
DAIRY PRODUCTS, VALUE	\$ 1,000,000	\$ 23,000,000
COAL PRODUCTION	931,000 Tons	5,800,000 Tons
MILES OF RAILWAY	1,000 Miles	4,800 Miles
POPULATION	200,000	640,000

AREA—254,000 square miles, twice as large as the British Isles, larger than France or Germany. Population 2.3 to the square mile, compared with 389 per square mile in the British Isles, 184 in France and 328 in Germany.

AGRICULTURAL LANDS—More than 60,000,000 acres of fertile lands capable of cultivation still untouched.

FREE HOMESTEADS—More than 15,000,000 acres of land still open for free entry.

IRRIGATION LANDS—One million acres now under irrigation, three million more capable of irrigation.

COAL—Largest coal resources of any similar area in the world. Alberta has 14 per cent. of the world's coal reserves; 72 per cent. of the British empire coal reserves and 87 per cent. of Canada's reserves.

NATURAL GAS—Four large fields now operating, supplying four cities and several towns with gas fuel.

OIL—Two producing fields, one containing the richest producing oil well in the world, bringing in 15,000 barrels monthly of almost pure naptha, in the Turner Valley. In the Wainwright field wells producing 80 to 150 barrels a day crude petroleum, other wells promising. Other fields being developed.

TIMBER—60,000 square miles of merchantable timber, including 270,000,000 cords of pulpwood.

TAR SANDS—15,000 square miles of rich tar sands, suitable for paving material or oil extraction.

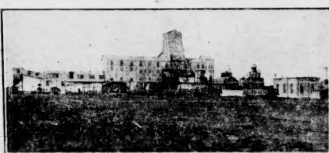

OTHER MINERALS—Include salt, bentonite, clay for ceramics, building stone, etc.

WATER POWER—Utilized and available estimated at 1,750,000 horse power.

FISHERIES—Extensive commercial fish possibilities. Annual production valued at \$400,000.

FURS AND GAME—Annual value furs and game over \$2,000,000.

TOURIST ATTRACTIONS—Three big mountain parks, including some of the most famous mountain resorts and scenery in the world.

AN ALBERTA COAL MINE

This page is published by this newspaper as part of a united effort by the Alberta Press Association to place before the people of Alberta the strong fundamental position of this province, her progress to date, and the great possibilities for the future.

Container For Iodine

Sublimed iodine may now be obtained in a glass pencil-shaped container. The case is equipped with a small rod and on this the chemical is fastened so that the piece is used as a dabber on no bottle or cork is needed. Tight arrangement prevents spilling, and the holder, being of thick glass, will not break easily.

Fish Eggs Arrive In Free State

Canadian fish eggs recently sent for experimentation in European and Japanese waters have been received in the Irish Free State and Japan in a very satisfactory state. The department of marine and fisheries has been advised. Fifty thousand speckled trout eggs were forwarded to Japan from Vancouver.

Woman Enters Taxi Business

Miss Helen Jane O'Farrell Kelly, a twenty-seven-year-old Irish girl who drove a British army motor lorry at the front during the war, and afterward was the first woman head of a company operating an independent fleet of omnibuses in London streets, has sold out to the bus trust, and is to enter the taxicab business.

Tips For Travellers In 1920

Travellers on English railroads in 1920 were well fortified with good advice before starting on a trip. Some of these age bits included a caution not to sit in any unusual place or position, to avoid seats on the roof, and a warning that passengers in second-class carriages having no doors should avoid sticking their feet out.

Best Time For Shearing

As soon as the sheep's fleece becomes shaggy shearing should be provided for. This practice is good for the sheep, for the wool and for the pocket book. As soon as the sheep is shorn, it should be dipped and well dipped at that. The dipping should be repeated in ten days._ticks are profit eaters.

For Sale—A quantity of 3C.W. barley for sale at 60c per bushel. J. C. Dickinson, Windhorst, Phone 1307.

Stock Pasture—Will take horses and cattle for pasture. Plenty of water and good grass.—R. Vadhvas, Mendon Creek.

For Sale—Star Solder, has been run one season; selling at a bargain. A floor lamp, vacuum cleaner, washing machine; also a quantity of ice. Apply Mrs. J. P. Reynolds, Phone 61.

For Sale—One Oliver 14 inch gang plow, and one two-way plow, 14 inch; inquire of Alex. Hinchman. Also two sets of used work harness; inquire of J. T. Kingsley.

Here and There

On May 16 two hundred new Scottish settlers arrived on the Canadian Pacific line "Metagan" in charge of Father R. A. Macdonell, managing director of the Scottish Immigration Aid Society. This is the second contingent of settlers brought out this year under the Clan Donald plan.

The well-known comic strip artist, Clare Briggs, of "Mr. and Mrs." fame, arrived in Montreal recently with six New York newspaper men. They then went up to the Laurentian mountains for some trout fishing on Lake Archambault and returned to the immediate vicinity of St. Donat, Chateau.

A. L. Rawlinson, passenger agent, and Victor Collignon, chief clerk of the Canadian Pacific Railway at Antwerp, have been appointed as Officers of the Order of the Romanian Crown by His Majesty, King of Roumania, for services rendered in connection with the general handling of Roumanian passengers at the port of Antwerp.

An innovation is now in use along the Laurentian line of the Canadian Pacific Railway in the form of two hospital cars which will meet any demand which arises or urgent calls that may occur in cases of illness. First-class cars have been converted into hospital rooms in such a way as to easily take care of four or five sick persons.

A record single shipment of Indian motorcycles, consisting of 85 cases from Amory, Mass., recently arrived in Tokyo, having come forward by Canadian Pacific rail and steamer lines. The demand for motorcycles in Japan is steadily increasing as this is considered a cheap and convenient method of locomotion and well suited to the somewhat narrow roads of the country.

Work on the New Grand Hotel at Yokohama, Japan, started in March after various citizens had pleaded with the municipality for at least one good hotel for one of the main ports of their Empire. The hotel structure will be of concrete with a steel frame and four stories in height. The estimated cost is \$1,500,000. Furnishings are expected to cost another \$250,000, bringing the total cost to \$2,000,000.

Initiative and resource shown by the Foreign Department of the Dominion Express Company went far to neutralize, if not entirely nullify, shipping troubles during the recent coal strike in England. A fleet of motor trucks in London, Manchester, Bradford and Liverpool carried out receipts and deliveries in the usual manner thereby eliminating any ill effects to the British-Canadian trade during the period of the strike.

The English Football Team now touring Canada was met at Quebec, where they arrived on the Canadian Pacific liner "Empress of Scotland," by Samuel Davidson, Secretary of the Dominion Football Association. The team played the first game in Montreal and then went on to carry out the schedule at Hamilton, Toronto, Fort William, Winnipeg, Regina, Lethbridge, Calgary, Vancouver, Nanaimo, Victoria, Edmonton, Saskatoon, Timmins. The tour ends July 14.

Mrs. Lalor's Hat Shop

Mrs. Lalor's Hat Shop will be closed during July and August. Hats now \$3.50 and \$4.50. House dresses \$1.25 each.

The United Church

"The Gentleness of God" will be the theme of the sermon by the Rev. Geo. Webber, next Sunday morning, June 13, at the 11 o'clock service. This is the first of two Sunday morning sermons on "Some Mountain Peaks of the Revelation of God."

The Sunday school meets immediately following the morning service of public worship, the junior school meeting in Harrison Hall; senior young people's and adult classes in St. Andrew's Church and Hall.

"The Cost of Character" will be next Sunday evening's theme, a practical Gospel address on some of the practical problems of life, in the light of the great Gospel of Jesus Christ.

There is always a cordial welcome extended to the stranger; and new-comers at these services. "Come then with us, and we will do thee good."

Four Square Gospel

Sunday, June 13th:

J. T. KINGSLEY

Reasons Why the U. F. A. Government Should be Returned

The main concern of the Province is that of administration, Public Health, Maintenance of Law and Order, Transportation, Education, Industrial and Agricultural Welfare, are among the principal functions of the Government of Alberta.

Administration and legislation can be best handled by a non-party government.

The U. F. A. system of Government is one of co-operation with other representatives in the interest of the Province. The party system is one of opposition.

The party system is organized from the top down, the U. F. A. system is organized from the bottom up. Under the U. F. A. system the power is with the people. It is not contended that the new system is perfect, but it is a big step in advance.

The political parties in Alberta are subject to dictation from their respective headquarters in Ottawa. The U. F. A. representatives are responsible only to the people of Alberta. Recent events have proved the necessity of having a Government in Alberta not subject to outside dictation.

All over the world the party system is breaking down.

The Alberta Government is not a class Government. It has always been prepared to co-operate with representatives of all interests elected to the Legislature.

Your only choice in this election is between the U. F. A. system of Democratic Government and the party system. There is no alternative.

"In the wake of the party system had followed corruption."—J. T. Shaw, Nov. 1921.

WORK AND VOTE FOR U. F. A. CANDIDATES—JOIN THE U. F. A.

This space is paid for by the membership of the U. F. A., for the information of the electors. Issued by the U. F. A. Publicity Committee, Calgary.
